EXPERIENCE

CloudQuish LLC [🌐] and A5IT [🌐] **Dec 2024 – Mar 2025**
Full Stack Developer *Remote*

- Engineered Cliova SaaS platform dashboard and landing pages using Next.js, Clerk authentication, ShadCN/ui, and Tailwind CSS; integrated backend APIs with NestJS and PostgreSQL for user management and email verification.
- Developed A5IT ecommerce admin dashboard with order management, inventory tracking, and dynamic pricing system; built corresponding Node.js RESTful APIs with TypeORM for backend operations and data persistence.
- Optimized A5Sync MSP platform frontend, resolving critical UI bugs and improving navigation workflows that enhanced user adoption and platform stability.

PROJECTS

Real Estate Microservices Platform [] | *NestJS, Spring Boot, Next.js, PostgreSQL, MySQL, Redis, Docker* [🌐]

- Deployed 5 independent microservices, PostgreSQL, MySQL, and Redis in production with live inter-service communication across distributed infrastructure.
- Implemented JWT authentication with RBAC, refresh token rotation via Redis, and role-based dashboards for buyers, sellers, and admins with 30+ REST API endpoints.
- Designed property approval workflows, advanced filtering with specification patterns with centralized error handling and Swagger documentation.

Tutooree - Find Tutors [] | *TypeScript, Express.js, Next.js, PostgreSQL* | *Ongoing* [🌐]

- Developed RESTful APIs for user authentication, profile management, and job posting.
- Used Zod for data validation, TypeORM for database interaction, and JWT for secure authentication.
- Styled the front-end using Tailwind CSS and ShadCNUI, and deployed the platform on Vercel.

Realtime Chat Application [] | *TypeScript, Express.js, Next.js, PostgreSQL, Docker* [🌐]

- Built real-time chat application with WebSocket support, JWT authentication, and message persistence using Express.js backend and Next.js frontend.
- Implemented secure REST APIs with TypeScript and PostgreSQL for user authentication and real-time messaging.
- Deployed on Vercel with Docker containerization for production deployment.

E-commerce Website [] | *React, Django, PostgreSQL* [🌐]

- Developed a full-featured e-commerce platform with product listing, filtering, cart, checkout, wishlist, and order management.
- Built customer functionalities such as login, registration, product reviews, and order tracking.
- Enabled vendor features for product management, order verification, user control, and sales analytics.
